Dear Mr. Perreault:

Re: Class H MIL-PRF-38534 Certification, Hybrid Microcircuits, FSC 5962, VQ(VQH-13-026350), CN# 039441

Your hybrid facility at the above address was sample audited the week of May 7, 2012 for compliance with MIL-PRF-38534 Class H. An acceptable level of confidence has been established that compliance with these requirements exists. Therefore, CMC Electronics, Incorporated's Class H certification is continued effective May 13, 2013.

This certification is for the following:

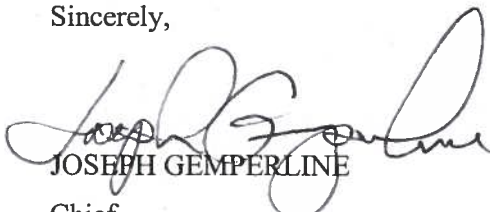

- a. Quality Management Plan: 411-178205-000 Rev. T
- b. Conversion of Customer Requirements: 411-128210-000 Rev. U
- c. Controlled documentation baseline for processing MIL-PRF-38534 devices: 411-178206-000 Rev. AE

This certification is valid until terminated by written notification from the qualifying activity. The normal period of certification is two years from the date of the audit and, if warranted, may be withdrawn by DLA Land and Maritime at any time. Your facility may be re-audited on a drop-in basis at any time.

All screening, qualification, conformance, and periodic inspection must be performed at a facility which has a DLA Land and Maritime letter of Laboratory Suitability for the applicable test method and condition. QML manufacturers shall notify the qualifying activity immediately after learning of a GIDEP alert, problem advisory or major quality/reliability problem affecting QML products. This includes failure to perform screening or sample testing (including inspection) in accordance with MIL-PRF-38534. Failure to provide notification may be grounds for removal from QML-38534.

If you have any questions, please contact Mr. Hancock at (614) 692-1309.

Sincerely,
