

InGaAs Avalanche Photodiode in Hermetic Package

CMC Electronics' 264-339767-VAR series is an InGaAs APD with low k-factor and high responsivity, in a TO-hermetic package.

Based on an industry-proven design and optimized for fast overload recovery, the 264-339767 InGaAs APDs have a high Quantum Efficiency (QE) over the wavelength range of 1000 to 1600 nm.

With low leakage current, high dynamic range is maintained even at high operating temperatures, reducing the need for cooling.

Customizations such as detector size, noise or responsivity screening are available upon request.

Features

- Active area from 20 – 200 µm
- Low k-factor InGaAs APD
- Low Noise Equivalent Power (NEP)
- High dynamic range
- Wide Operating Temp Range
- 264-339767 Series: Hermetic TO-46 Case
- 276-339767 Series: Fiber Pigtailed
(Typical coupling efficiency: > 90 %)

Applications

- Range Finding
- Optical time-domain reflectometer (OTDR)
- LiDAR
- Industrial, Analytical
